

To Whom It May Concern:

We testify using LIHSA (a full internet access system for hotel industry) for more than two years, by now. We are very impressed with its performance and flexibility, which brought not just satisfaction to our clients, but also substantial profit increases for us.

The maintenance service, provided by ARVO Group, as a Romanian LOCATEL distributor, proved to be prompt and efficient, in the few occasions it was needed.

Therefore, we gladly recommend their products and services as being very effective and competitive.

Sincerely yours,

Pierre Boissel,  
General Manager
