UNOMedia = Hotel Phone + Clock Radio + Audio Dock

Audio Dock

1+1+1 = UNOMedia

Why buy more stuff for your rooms than you need?

UNOMedia is a unique converged solution that brings together for the very first time a full-featured hotel phone, an easy to use clock radio with high-end sound and a convenient audio player interface. So instead of two separate devices, now you need just one UNOMedia.

Don't you just love the new math?

What is UNOMedia?

UNOMedia is Bittel's platform for a new class of telephony products. The flagship UNOMedia model combines for the very first time in hospitality:

- A guest room phone with all the necessary modern features.
- An easy-to-use alarm clock/radio with high-end audio performance.
- iPod/iPhone/mp3 player interface so guests can enjoy their music on the go.

UNOMedia eliminates the need for hotels to buy a separate phone and clock/radio/iPod dock for their guestrooms. Typically deployed at the nightstand, UNOMedia takes the place of two separate devices.

UNOMedia Provides Several Key Benefits

- Saves space by eliminating the need to deploy a separate phone and clock radio.
- Helps eliminate clutter by reducing the number of cables at the installed location.
- Easy-to-use alarm clock/radio with simple controls and high end audio performance.
- Audio player interface (Dual USB plus line input) supports a wide range of portable personal electronic devices. Optional AudioDock unit installs securely into USB port.
- Improved industrial design raises the bar for the aesthetics of a hotel guest room phone. UNOMedia blends well visually with other high-tech devices in the room, such as flatscreen televisions, room & entertainment controls, and the like.
- Complete suite of solutions, including slimmer phone-only models with no display; phone/clock/audio player models with hard key interfaces for affordability; touch screen models for delivering interactive content and room controls on a crisp color touch display; cordless remote handsets that securely link to a common base station within a room or suite; trimline models for bath and public areas.
